CFORCE

## Going green off-road... Why not ?

No internal combustion means no hot engine parts, no exhaust emissions, and no noise. Clean, quiet, and cool fun lead the way into the authentic off-road experience, where kids can hear the sounds of nature—and the voices of their parents. Take your vehicle more places, open the possibilities to more adventures with the new dimension of ATV energy.

- # Ride all day with up to 60km long range
- # Custom built lithium battery:  
2332Wh, 44v, 53Ah
- # Energy recuperation through regenerative braking extends the range
- # Compact dimensions for easy handling:  
1490 x 950 x 925mm
- # Low 685mm seat height is welcoming for growing riders

## Superb power and handling capabilities

—limited only by mom and dad.

The strong, tractable pull of the CFORCE EV110 rivals the performance of petrol-powered ATVs, with enhanced control capabilities that can grow with riders as they learn. At full capacity, the powerful electric motor can deliver peak torque in a quick, linear manner. Acceleration is smooth and predictable, while also responsive for a thrilling, all the while controllable experience.

Max power: **4.5 kw**  
Max torque **40 N.m**  
Top speed **45km/h** (28 mph)  
Two-wheel drive

# CFORCE

#

A purpose-built chassis gives youth riders a “full-size” ATV experience where they can advance their skills. Suspension is tuned for the weight of younger riders, and to filter out bumps big and small. Hydraulic front and rear brakes provide strong and reliable stopping ability while engine braking adds a natural level of holdback for better control on descents.

- # Wide handlebar, seat and large tires provide a comfortable and ideally sized riding experience
- # Front suspension: double independent A-arms, 140mm travel
- # Rear suspension: monoshock swingarm, 165mm travel
- # Hydraulic disc brakes, front and rear.
- # All-terrain tires provide excellent traction and a comfortable ride

# EV110

## Easy to ride —focus on fun!

- # No clutch. Control drive with simple F-N-R switch.
- # Dual ride modes with S for higher speeds (24-45 km/h) and E for longer range (limited to 24 km/h).
- # Left-hand lever controls front brakes; right-side foot pedal controls rear brakes.
- # 3.5-inch LCD dashboard display features Start/Stop and SOS call button.

## Innovative Safety Features

Parents can enjoy the experience as much as their young riders with the confidence of safety with the dual-channel e-throttle, magnetic safety tether, adjustable speed limit and a safety flag, which are all standard features of the CFORCE EV110.

- # Taking safety and parental controls to the next level is the CFMOTO YOUTH APP.
- # Vehicle location monitor, geofencing, SOS call, call back, low battery alert, custom speed limitation all in one app.
- # CFMOTO YOUTH APP user interface is simple and clear, putting vehicle safety and riding data in the palm of your hand.

Secure data at  
your fingertips

## Lithium Battery with CFMOTO BMS System

Lithium battery combines with intelligent Battery Management System for guaranteed safety and convenience. BMS system safeguards and monitors battery status, charging status, charging time, etc. for optimum safety and extended battery life. IP67 level water-/dust-proof e-motor, battery and electronics can stand up to the elements even in the toughest adventures.

- # Long range, long battery life with fast charging (0 to full in approximately 4 hours).
- # Battery is designed for plug-in charging on-board as well as portable charging off-board.
- # Soft-packing lithium battery with battery case made from aircraft-grade aluminium.

## Futuristic Design Cues

— Laying the groundwork  
for future of the ATV world.

- # Closed grill and full wheel covers maximize aero while minimizing dirt/debris buildup
- # Integrated day-running light
- # LED brake light
